

Project Management: Classroom and Online Learning

For professionals with limited time out the office wanting to build key skills to keep projects on task, on time & on budget.

**1 August -
27 September 2019**

The blended-learning, classroom and online based project management programme, uses **an integrated, eight-week schedule for busy, working professionals and allows for both face-to-face and virtual interaction with course instructors and other participants.** As project management skills are in high demand, this programme gives you skills to effectively execute projects and manage risks in virtually any field, demonstrating your competency as a project manager.

DURATION > Eight weeks

DATES > 1 August – 27 September 2019

Who should attend?

- > Project team leads and team members who want to build their knowledge and skills in project management to more effectively plan, collaborate and execute projects; and
- > Professionals who have who have limited out-of-office time.

Key focus areas:

- > A blended classroom-based and online curriculum that aligns with the principles covered in the Project Management Institute, A Guide to the Project Management Body of Knowledge (PMBOK®Guide);
- > Models of leadership and how they apply to projects, as well

as stakeholder management, team engagement, effective modes of communication and resource management;

- > A project/case study that integrates and applies lessons from each module;
- > The relationship of projects to organisational strategies;
- > Project management methodologies that have

occurred due to current and emerging technologies;

- > Processes, procedures, tools and techniques used for executing projects; and
- > Enhancing organisational success through cost effective, quality, on time delivery of projects that are aligned to company goals and objectives.

How you will benefit:

At the end of the programme, you will be able to:

- > Apply project management practices to achieve success in a wide variety of fields;
- > Draw on critical tools and techniques to work in a dynamic project management environment;
- > Run projects on time and within budget using standard, globally-recognised processes;
- > Effectively execute projects and identify and manage project risk;
- > Apply your knowledge and skillsets to managing projects, within your industry, ensuring timely and cost-effective completion of critical projects;
- > Manage project challenges and complexities as they arise;
- > Understand key financial management principles; and
- > Demonstrate your competency as a project manager.
